

**"Comments on United States v.  
City of Ferguson,  
Case No. 4:16CV180 CDP"**

**No addresses were to appear on the comments. This is a strange 'set up', for it is the residents of the city of Ferguson who will be personally affected and impacted by the DOJ'S edicts. In that there is no requirement for name to be associated with address, it is impossible to differentiate the comments that come from those of us who dwell here, from those outside of our city.**

**It is a disappointment to me, and appears that the Department of Justice has little interest in identifying what comments and concerns come from the people of Ferguson. So how can I take seriously that the Federal government is in good faith actually interested in what the citizens of Ferguson have to say?**

**In reality, the entire world was invited to comment. We the city of Ferguson are correcting the ways and sins of this city's certain individuals pasts.**

**The DOJ'S own continuing mantra about 'protecting the citizens of Ferguson' proves how in the dark the DOJ is about our city. For people north and south, east and west of Ferguson WISH they could live in the safety and friendship of Ferguson.**
